Education

- Siddaganga Institute Of Technology** 2021-2025
Bachelor of Engineering in Computer Science CGPA: 8.98
- Cambridge Court High School** 2016-2020
Jaipur, Rajasthan

Experience

- Oracle** June 2025-Present
Associate Software Engineer Bengaluru
 - Designed and implemented an AI-driven solution to automatically generate standardized Business Requirement Documents (BRDs) from Zoom AI meeting summaries, eliminating manual documentation effort and reducing requirement gaps and rework.
 - Built an Oracle Integration Cloud assessment utility that scans exported integration artifacts and generates health/compliance reports across areas like complexity, synchronous/asynchronous flow patterns, fault handling, version drift, unused integrations, and configuration risks.
 - Building an automated agent workflow to compare new and past SRs, summarize key details, and send contextual Slack notifications containing both new and similar SRs for faster issue resolution.
- Target** February 2025-June 2025
Apprentice Tech-Software Developer Bengaluru
 - Implemented conditional access validation logic for TAP integrated overwatch applications
 - Implemented UI test cases for the Overwatch application to ensure feature reliability, covering key user flows, edge cases.
 - Gaining hands-on experience in full stack development using SpringBoot, Kotlin, Reactjs and PostgreSQL

Personal Projects

- Inventory Management System**
A robust Inventory Management System with complete stock control, sales tracking, and real-time reporting of warehouse operations.
 - Built an Inventory Management System (IMS) with full CRUD functionality to manage warehouse stock, including adding new products and updating existing inventory.
 - Implemented stock operations allowing users to add products, sell items by removing them from inventory, and maintain real-time stock levels.
 - Generated detailed transaction reports tracking all inbound and outbound stock movements for better visibility and warehouse auditing.
 - Technology used: Reactjs, SpringBoot, Kotlin, PostgreSQL
 - [Github Link](#)
- JobPortal**
An innovative job portal designed to connect professionals with tailored opportunities.
 - Filter job listings by title, location, posting time, and more.
 - Implemented user authentication and registration using email, password.
 - Allow registered users to post, edit, and manage their job listings.
 - Implemented pagination and crafted an awesome UI for an outstanding user experience.
 - Technology used: TailwindCSS, React.js, Node.js, Express.js, MongoDB
 - [Github Link](#)

Technical Skills

Languages: C/C++, Python, JavaScript, HTML/CSS

Developer Tools: Git, Docker, Visual Studio

Frameworks: React, Redux, Node.js, Express.js, FastAPI, LangChain

Databases: MongoDB, MySQL, Oracle Database 23ai

Cloud Technologies: Amazon Web Services(AWS)

Coursework: Object-Oriented Programming, Computer Networks, Operating System, Database Management System, Data Structures and Algorithms

CERTIFICATIONS AND ACHIEVEMENTS

Successfully completed the course on DSA Live Training Program. [Certificate](#)

Solved 400+ problems on various coding platforms
